BIOCLIMATIC PERGOLA / ROLLINGROOF

The roof of this pergola consists of aluminium louvres with various functions. Keep out the sun, let in a breeze or stay one step ahead of the rain? With the Somfy remote control, rotating the louvres in your pergola has never been so easy.

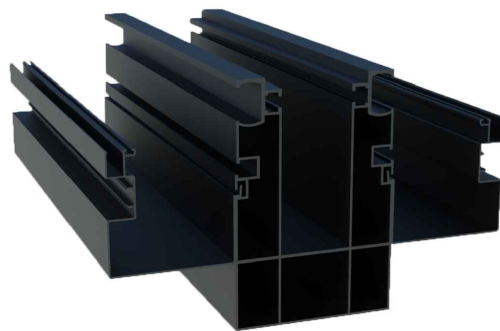

After a rain shower, the roof can be opened again quickly and easily, while the water is drained in a controlled manner. What is more: the patented shape of the louvres prevents you from getting an unexpected shower yourself when you open the louvres after a period of rain!

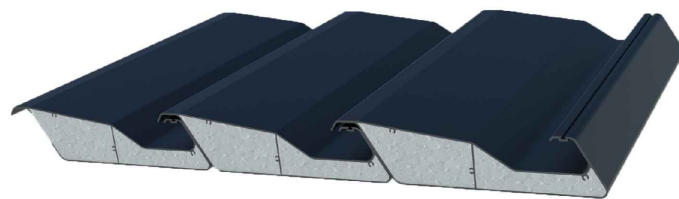

The louvers that has 105-degrees opening capacity allows optimum utilization of sunlight.

Aesthetic water drainage system

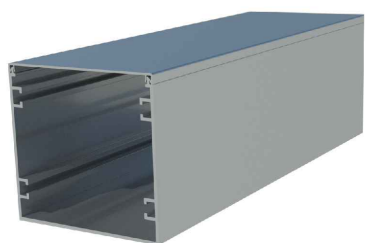

Specially designed double rail system provides opening up to 10 meter

Louvers can be filled with Polystyrene Foam which provides extra comfort. It significantly helps to reduce condensation.

BIOCLIMATIC MAIN PROFILES

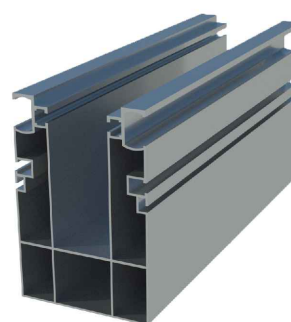

Pillar (170x160x2,5mm)
5,3 kg/m

Gutter (150x160x2mm)
5,3 kg/m

Louver (70x298x2mm)
4,2 kg/m

Rail (238x156x2,3mm)
